Also included in FIFA 22 is a brand new "Play Anywhere" feature, allowing players to choose their preferred way of playing and play the game on both Xbox One and PC, on-the-go. Available on Xbox One and Windows 10 PCs, FIFA 22 will be available digitally on the Xbox Store for £49.99 / €59.99 and the EA Sports FIFA Store for £29.99 / €39.99. In FIFA Ultimate Team, the best football players are updated in a variety of ways, including but not limited to: skills, player ratings, player performances, team chemistry, players in-game appearances, team kits, stadiums, and more. In Ultimate Team mode, players earn experience points (XP) through games, which determines whether they get to improve their attributes, or if they start off with a similar rating but higher skill compared to a previously played player. While this is technically a niche case, though I understand the appeal and potential, it's still an incredibly big deal. Apple normally is hesitant to release information about their testing of Touch ID on the iPhone. The FBI is running on a 3 week timeline to obtain Apple's help decrypting an iPhone 5C used by a mass murderer in California. Earlier this month, Apple made a deal with San Bernardino County and the Justice Department to help the FBI gain access to the device. Touch ID on Apple's iPhone is based on sophisticated analysis of a fingerprint, and it's likely that the FBI would need Apple's help in order to get the raw data and analysis behind the Touch ID feature. What's interesting is that the case may now be a potential catalyst to force Apple to open up to the public. While Apple does allow FBI access to their server and hardware through the company's cloud, the FBI has been looking for a way to unlock phones without having access to a server. Ever since Apple rejected the agency's initial request in September, the government is trying to stall by potentially setting a deadline. So are they going to set the deadline, or are they going to call the bluff of Apple's increased security and focus on a legislative solution? Either way, it's an interesting development. The implications are great This will be an interesting test case to see if this is a genuine push for digital privacy rights by Apple, or a ploy to just
