United Nations Naval Forces Union (UNNFU) was established following the events that led to the last World War in the XX century. Due to the volatile geopolitical situation, several conflicts erupted in the area. The main purpose of this game is to help all of the participating countries to live in a peaceful and free world, while maintaining its optimal nature. Recently GameDome has released a new article entitled, "Is the DOTA 2's Fan Base Becoming Unhealthy?" where they've posted a few statistics regarding the games' growing popularity and the influence of DOTA 2's managed community. Basically, DOTA 2 has gained much popularity among the teenagers who are quite a bit more active on the forums and the discussions compared to the average of the past. One of the interesting things is that, in the last two years, DOTA 2's managed community has grown faster compared to the past. Their size has also increased to over 17,000 players and their activity has stayed at 20,000 players over the past four years. In the last few months, mostly, western players were active on the forums, which we can see it on the growing Activity Statistics. Also, DOTA 2 hasn't become more popular in Asia and Europe compared to the past. However, it is quite hard to reach hard numbers since most of the players are not based on the US-based servers. The changes that Dota 2's Game Design team have done over the past few years have produced great results, regardless whether people like them or not. Valve, the company behind Dota 2, has recently announced that the game is the biggest player in terms of active players, surpassing BF3. In their forums, they've posted a nice new infographic representing the size of the different player bases. The graphics are quite nice and they're using a lot of statistics in order to tell the whole story. Based on the infographic, we can see that Dota 2 has a huge playerbase of 144,724 players right now, which is a bit more than Steam's 120,000. They also updated their subscription chart, with a nice new graphics illustrating the statistics, so check it out. Dota 2 has been around for about a year and a half now, and we're still playing its 2.1 patch which was released a few months ago. In order to install this

Outlandish Operations is a multiplayer online sci-fi card game created by development studio Clan Tier. Outlander is a Free to Play Sci-Fi Cooperative Card Game, where 2-5 players work together to defend humanity against an onslaught of alien invaders. Outlander has been greenlit for Steam, Playstation 4 and Xbox One. Clan Tier's vision is to create a world-class team-based card game that is easy to pick up and play. Outlander is the evolution of that vision. While creating an accessible video game featuring tons of "cards" and flashy visuals is no small feat, we've done it. Play As A Outlander! Outlander is set in the 24th Century. You play a native to a solar system populated by Humans and unique sentient species. Outlanders are the protector of humanity. Our technology and scientific advancements have made us a power we cannot escape. We are the future. You are assigned to one of the six planets in our solar system; Mars, Elysium, Elysia, Andra, Icaria and Themler. Your planet of assignment is determined by an Alignment, a sacred law handed down to your people, who are clans. You are assigned to one of these clans, which define your loyalties and influence the rest of the game. Outlander is the first cooperative multiplayer game where players can choose their own faction and dictate what kind of gameplay they want to engage in. A Card-Based Sci-Fi Multiplayer Game You are powerful because of your individual Outlander cards. Each card has a unique combination of abilities that when you put them all together, you get to tell the story of your team's one-of-a-kind Outlander team. Playing your cards in unique ways adds strategy that makes every Outlander team different and unique. Galactic Outlander! Each planet in Outlander has its own type of flora and fauna that assist in your mission of defending your homeworld. You must master your skills as a craftsman and strategist to avoid the alien assaults and establish a solid defense line. Turns are divided into military, construction and researching rounds. The military and construction turn is more tactical and strategic, while the researching round focuses on growing your tools of destruction. As the defending team, the first card you play is the O-Card, which is the base for your Outlander. Your Outlander cards are stacked on the O-Card, which are built through c9d1549cdd

As its name implies, this is a Jump & Run platformer, in which you have to avoid some stuff, for example splids or balls, to pass the level. You have to climb ladders, run onto balloons, jump off walls, etc. (See all actions: are 15 level per world. The last level in each world is a boss level!... Worms Battlegrounds is a fast-paced multiplayer online game that features the worms in a head-to-head arena. You can play in many modes like Regular, Survival and Versus. Your worms collect power-ups that can change their attack behavior, and each match is the winner of the last. This is the iOS version of the popular and popular Unreal Tournament 2004 mod known as "Unreal Tournament Mobile." This is in no way affiliated with Epic Games - however we did borrow the Unreal 3 engine and artist models from the mod. Epic Games has no plans to port the game to iOS as there are no plans to port Unreal Tournament 2004 to iOS devices. By using Unreal Tournament Mobile we hope to preserve this modification for all future formats and platforms.NOTE: This mod is based on an Unreal Tournament 2004 stand-alone version that was released under the GNU GPL license. You can see the various versions in our Downloads page. This game is completely unofficial and not endorsed by Epic Games. CS GO Arcade Missions is a free of charge, unofficial server, where players have access to the classic Arcade maps, which were previously available only for non-public servers. Here's a list of Arcade maps: CZ-75: The game was firstly released as 2x2 game on Windows. It was later ported to C64, Amiga, and a number of other platforms. There are 4 modes available. "Arcade Mode" has two teams, and the players have to win the time (about 30 minutes). At the end of time the player with the most points gets the victory. "Best of 3 Mode" is a 3x3 game, where the match is won when one of the teams wins two games. The last mode is "Best of 5", where the teams fight for two victories in a row. Doom: The arcade mode has 2 teams, and the games are played in a same way as in Doom 2, but that mode has been expanded (about 100 levels).

What's new in Lost Cosmonauts ARG:

has published a useful guide on how to evaluate the game on the Nintendo Switch. Despite a narrative focus there is enough of the Star Wars content to legitimise it as being more than a kids space shooter. I also really enjoyed the dogfight mode that is a little steep on its own - let players join an org like the Rebels or the Empire. Gaijin It's hard to ignore the spiritual successor to the venerable Starfighter Command series in Gaijin. If you have fond memories of the arcade SFC, that one should definitely not be ruled out by simply being on the Nintendo Switch. If you're thinking about buying Gaijin on the Switch, at least the first few levels are free so you can try the game out yourself. Sierra Club This is an interesting one on the Switch, as Sierra Club is actually a re-branding of an old PC title - Sierra Lemurian RPG. I'm not a big fan of beat 'em ups, and I haven't played this game before, so I was a little unsure what I would think. However, despite it really being a new game, that thing that made Lemurian RPG so great on PC - the loot - is just as present and powerful on the Nintendo Switch, at least in the first half or so. I got stuck in during this review, the bosses just not being that easy, but oh boy do I wish I had the big stick armour that I used on the PC. Battlezone You can't get away from Battlezone, now that is a classic little shooter game. I'm not comparing this game to previous realisation of the franchise, as this is a very different game - Battlezone Defence. You do need to be careful here, a lot of side objectives are actually a death sentence for the player, as they will send the progress back to where you died! By comparison to previous versions, this one is a little easy, and a little more difficult a little too. However, I did find the enemy behaviour sometimes prone to exploit! Tyrian I just couldn't write a Star Wars review without mentioning the space shooter - Tyrian. If you owned an 8-bit Atari with your eye on a budget Switch rental, you'd probably pick this game up after a few days without reading the review.
