#### ShareX Crack Free [Win/Mac]

ShareX Crack For Windows is a feature-rich and powerful screenshot grabbing tool for Windows users. Honestly, it's one the most impressive graphic capturing tools we've come across on Softpedia in the freeware section. It's open-source and filled with numerous configuration settings to help you upload the images online, execute automatic post-grabbing actions, making image adjustments, applying watermarks, and a lot more. Free and open-source snapshot grabber Firstly, you can make a clean and rapid installation with ShareX Torrent Download, thanks to the fact that it doesn't bundle third-party components. It creates an icon in the system tray at startup for quick access, allowing you to rapidly capture the screen in several ways as well as bring up the main window for tinkering with settings. Manual or automatic capturing mode It is possible to capture the full screen, active window, monitor, rectangle, rounded rectangle, ellipse, triangle, diamond, polygon, free hand and last region, as well as to start a recording session and save the footage as a video or a GIF animations. An automatic image capturing mode can be enabled for those times when you plan to leave the workstation unattended while indirectly keeping an eye on its activity. You can specify the repeat time, select a region or full screen, as well as set it to automatically minimize to the system tray area and to wait until the uploads are complete. Copy, save, adjust, enhance, and upload grabbed photos As far as post-capturing actions go, you can resize images, add watermarks and captions, borders or shadows, print pictures or copy them to the Clipboard, save them to a preferred file type on the disk (e.g. PNG, JPG), as well as upload them and specify the host. Here, the beauty is that you can select multiple actions to take into account simultaneously and automatically. For instance, you can save the image to file, copy it the Clipboard, and upload it on a server at the same time. Once the pictures are uploaded, you can use a URL shortener, post the link to a social networking platform, or send it via email. ShareX offers support for multiple hosts when it comes to the image uploader (e.g. Imgur.com, Pastebin.com, Dropbox.com), text uploader (e.g. Pastebin.com, Pastee.org), file uploader (e.g. Google Drive, FTP server, shared folder
